The resolution for this agenda requires the majority of votes of shareholders and proxy holders who attend the meeting and cast their votes.

Agenda 4 To consider and approve the appropriation of profits for the financial year 2024-25 and omission of the dividend payment**Objective and Reason:**

- The Public Limited Company Act B.E. 2535, section 116 and Articles of Association of Tata Steel (Thailand) Public Company Limited ("TSTH"), clause 46, specified that "The Company shall allocate not less than five percent (5%) of its annual net profit less the accumulated losses brought forward (if any) to a reserve fund until this fund attains an amount not less than 10 % of the registered capital."
- According to the dividend policy of the Company, dividend payment to the shareholders to be done from net profit after tax after deduction of legal reserve and considering the relevant factors which shall not cause significant effects to the Company's business operation. Factors such as the operational performance, financial status, solvency, business expansion, obligations to complete the debts service according to the Company's loan agreements including any other factors relevant to the business operation of the Company to be considered in this regard. The consideration shall be consistent with the concept of maximizing long-term benefit for the shareholders.
- The operation of the Company from consolidated financial statement, for the financial year 2024-25, resulted in a net profit of 333.11 million Baht with retained earnings of 567.31 million Baht. The consolidated net profit included 260 million Baht, being a one-off gain from the disposal of an unused land plot. The operation from separate financial statement resulted in a net profit of 19.73 million Baht with retained earnings of 917.54 million Baht as at 31st March, 2025.

Agenda 8: Other Business (if any)

Chairman reported that all agenda items as per the Notice to the Shareholders were completed and the Board of Directors and the shareholders did not have any further items to propose to the Shareholders' meeting.

Chairman then took up the questions received from the Shareholders and requested Mr. Chaichalerm Bunyanuwat to translate his responses in Thai language. There were seven questions received in advance.

1. Is the competition from China and other neighboring countries more intense now? What is the company's strategy to face the increased imports of wire rods into the country?

Answer: Exports of steel from China has been increasing substantially over the last couple of years. In 2022 it was +60 million tons, in 2023 it was +90 million tons and based on initial estimates, it is expected to be more than 110 million tons in 2024. Accordingly, competition from China is becoming more intense.

China and neighboring countries like Malaysia, Indonesia, and Vietnam continue to export steel to Thailand, especially wire rod, the product that the company produces. In 2023, the export of wire rod from China was 519,000 tons, 52% higher than 2022, and wire rod imports from neighboring countries like Malaysia, Indonesia, and Vietnam were 417,000 tons, 19% higher compared to 2022. The trend of imports from China and these countries remains the same in 2024 during the first 5 months.

The company's strategy to compete with high imports are as follows:

1. Improve services in terms of lead time to customers so that customers are not required to maintain high inventory.
2. Develop the quality to match with customer processes. This enables product delivery tailor-made for the specific requirements of each customer.
3. Develop new products for automotive segment. Accordingly, we are focusing on tire cord and tire bead to service both domestic and export customers.

- 2) How does the company handle the fluctuations in the value of the baht?

Answer: Thai baht had depreciated by around 7% during the financial year 2023-24 vis-à-vis US Dollar. While this has a positive impact on exports, it is adverse towards the cost of imports made by the company. As can be seen from the daily movement of the currency, Thai baht volatility has increased. The volatility makes it extremely challenging - to plan exports and do import price negotiations.

In this backdrop, the company has continued a conservative approach towards managing foreign currency. The company has a policy of covering at least 70% of its net foreign currency exposure with forward covers. Forward against imports are taken on the contract date, and on the bill of lading date for exports.

- 3) The company has reported the sale of MBF plant & machinery which was held for sale. What is the future plan with the land once the dismantling is complete?

Answer: The MBF complex occupies an area of approximately 300 rai. It is expected to take 12-18 months to complete the dismantling and clearing the land for any future use. Various options for the best utilization of the land will be explored and the company will revert to the shareholders when any plans are concluded.

- 4) Since domestic demand is still not improved, does the company plan to increase exports?

Tata Steel (Thailand) Public Company Limited

Answer: Exports have been and will continue to remain an integral part of the company's strategy. We continue to look for opportunities in more markets to export. We have developed products for tire cords and tire beads which can be exported to many customers. Presently, many customers are concerned about the carbon footprint of the products and the environment. The company's product comes from Electric Arc Furnace which uses recycled scrap that has considerably lower carbon footprint compared to the more widespread blast furnace route for steel making.

We also continue to prepare licenses for export such as ACRS for the Australia market, BIS for India, and UK Cares for Singapore, Hongkong, and EU countries. Moreover, we are the 1st rebar producer in Thailand to get the Environment Product Declaration certificate which many international customers expect.

- 5) The government has announced its intention to implement a carbon tax by 2025. How is the company preparing for it?

Answer: We will monitor the developments in the government regulations for the carbon tax regime and will be prepared as the policy unfolds. The company uses recycled steel scrap that creates CO₂ emission of 0.6-0.7 tons carbon / ton of liquid steel which is significantly lower than steel produced from blast furnaces that generates CO₂ emission of 2.4 tco₂ per ton of liquid steel. In parallel, the company continues to improve operating efficiency in the areas of energy reduction, including installing solar roof tops.

- 6) Does the Company have any plans for setting up induction furnace facilities?

Answer: Average capacity utilization of steel manufacturers in Thailand is currently below 30%. Against this, the company operates in the range 65-70% of the rolling capacity due to good acceptance of products by the customers. Therefore, the priority of the Company is to maximize utilization of the existing rolling capacity of 1.7 MTPA before any further capacity addition. In addition, the Company continues to explore opportunities to increase value added products.

- 7) Currently, what proportion of power requirement is served from solar energy?

Answer: The company is currently installing solar power capacity of 11.50 MWp in its 3 plants. It is expected to be operational by end of 2024, accounting for 2% of the energy requirements of the company.

Chairman thanked the Shareholders for sending the questions and reported that the company has answered all the questions it had received in advance. On behalf of the Board of Directors of Tata Steel (Thailand) Public Company Limited, he thanked each and every Shareholder for devoting their time to attend the meeting and approving the proposals submitted by the Board of Directors. He then proposed to close the meeting.

The meeting was adjourned at 10:30 hours.
